1-AII

Which of the strategies do you think you should implement for your self?

Are there other strategies that you would like to invoke or that you have successfully invoked?

Distractions

Focus

- Environment: comfortable, landscape photos, shut out noise (using instrumental music, white noise)
- Nutrition- water, eat breakfast
- Get up and move around

Mindset

- Have a focused time to deal with worries
- 1 task at a time
- Close email and chat
- Switch between hi and low attention tasks
- Prioritize
- Reward yourself

Identify your Interrupters (interrupter log)

- Interrupters log
- Separate valid from invalid interrupters
- Plan your calls
- Consider the interruption before getting caught up in their urgency
- Available and Unavailable time (be careful with too many barriers and let people know what constitutes an emergency)
- Learn to say “No”
- Invitation only time
- Social media impact
- IM impact
- Browsing
- Phone calls
- Other people
- You- sleep, nutrition, energy level

Procrastination

Choosing enjoyable over priority

- Not laziness
- Habit

Overcoming the Procrastination Habit

- Recognize if it is a problem and why
- Imposter syndrome, fear of failure
- Don't like the task
- Forgive your self of the past
- Don't label yourself a "procrastinator"
- Use self-controlling language "I choose to" versus "I have to"
- Move the task to the top of the day and do it in bite size (time bound) pieces
- Reward your self
- Ask someone to partner with you
- Tackle issue as they come
- Minimize distractions
- Scheduling
- Prioritizing

Active procrastination - if you thrive under pressure, make sure it only affects you
