

Regulatory Organization

Multi-Site Research Projects

Amy Gest
Resuscitation Outcomes Consortium
Research Coordinator

Regulatory Requirements

- Federal Wide Assurance—FWA
- IRB Submission
- IRB Approval
- Locally Approved Consents
- Human Subjects Training

OHRP Regulatory

- Confirm site Federal-wide Assurance is current—OHRP has an online database
- Develop an online regulatory documents database that accepts site submissions and approvals and will also alert site and coordinating center about upcoming expirations or expired documents.

FDA Requirements

- Support sites with FDA requirements: 1572-Statement of Investigator
- Prepare and manage IND/IDE reports and other requirements

Human Subjects Protections

- Track human subject's protection training for appropriate study staff
- Create and distribute consent/notification document templates
- Ensure that IRB-approved consent forms at clinical sites have required elements and are factually correct

Human Subjects Protections

- Track consent forms annual approval and review consent documents for signatures and use of IRB date stamp (or other verification)
- Develop a reporting process for adverse events and unanticipated problems that are specific and in compliance with all local IRB requirements, FDA if appropriate and
- Report all events to the Data and Safety Monitoring Board

Organizing without a database

- Collect documents by email, save on network drive, and print out a hard copy
- Track documents on an Excel spreadsheet by site
- Send weekly status reports to sites for expirations within 8 weeks

Site spreadsheet
