Clinical Research Education Series 2021

Speaking Truth to Power: How to Spot Risk and Guide Your Study PI/Sponsor to Good Patient Outcomes

Presented by: Teddy Johnson

Director of Technology Development for ITHS

Institute of Translational Health Sciences ACCELERATING RESEARCH. IMPROVING HEALTH.

Learning Objectives

Identify risks associated with a new therapy or product

Consider the multiple perspectives involved in clinical decision-making

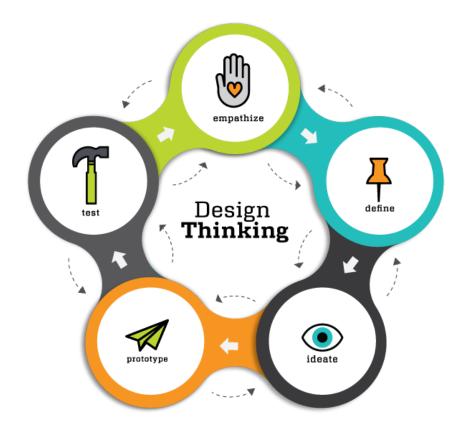

Identify opportunities to make your voice heard

Getting to Know Each Other

Stanford ENGINEERING

Mechanical Engineering

Little Old Lady Getting Bypass Surgery

Inspiration

Innovation

HEART)PORT®

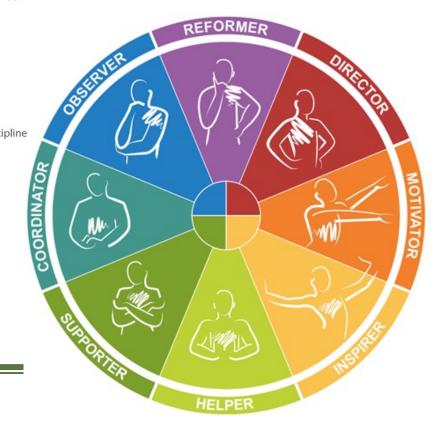

What about You?

Poll: How would you categorize yourself?

The order and strength of the four colour energies in each participant generates eight types:

Director | Extraverted Thinking | Results focus, decisive, assertive Motivator | Extraverted Intuition | Drive, enthusiasm, positive thinking Inspirer | Extraverted Feeling | Persuasive, creative, people skills Helper | Introverted Intuition with Extraverted Sensing | Flexible and helps others, shared ideas Supporter | Introverted Feeling | Listens, loyal, team approach Coordinator | Introverting Sensing | Planning, organising, time management Observer | Introverted Thinking | Sets standards, Product knowledge, analysis Reformer | Extraverted Sensing with Introverted Intuition | Determination, monitoring performance, discipline

Questions?

ITHS Institute of Translational Health Sciences Accelerating Research. IMPROVING HEALTH.

Preparing for Trouble

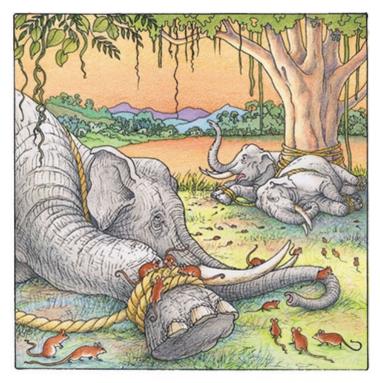

Build affirmations and rewards into site training

Show them how you can help with their problems

Once upon a time, a group of rats were living happily under a tree in a forest. On a sunny hot day, a group of elephants, in search of water walked through the area where the rats were living. As the elephants walked, they destroyed the homes of those rats and even killed some of them. The rats ran to the king of the rats for help.

The king of the rats went to the chief of those elephants and requested that they take an alternative route to the pond. The chief of the elephants accepted the request of the rats and asked the other elephants to go the other way, without disturbing the rats.

The king of the rats was very happy and pleased by the gesture of the chief of the elephants. He thanked the elephants and promised that in return the rats would surely help the elephants when needed in the future. Hearing what the rat said, the elephants laughed thinking how could a small rat help big elephants.

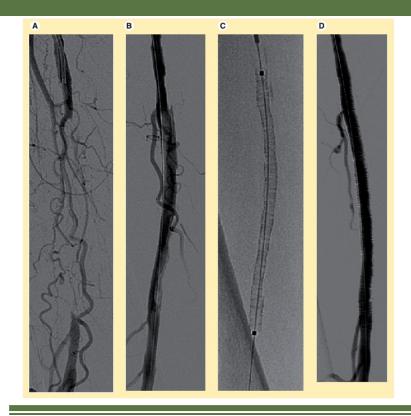

After a few months, on another pleasant day, when the rats were playing they heard a loud shouts of elephants coming from the direction of the pond. The king of the rats realized that the elephants were in danger. He asked some of the strong rats in his group to come along, and they went in the direction of that sound.

Near the pond, they saw the elephants captured in traps set by some hunters. The rats quickly started biting the ropes, and soon the elephants were set free. The elephants thanked the rats and also apologized for making fun of them the other day.

Stop the Trial?

Smart, honest CEO cared about patients

Stent expected by leading physicians to be the best in class

Stent delivery system worked well for some doctors but not others

Pressure from investors to continue

Bad results could doom the company

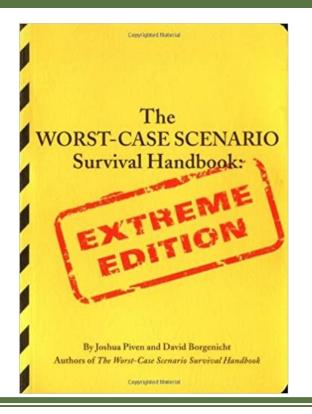

The Trial Continued

Institute of Translational Health Sciences accelerating research. IMPROVING HEALTH.

How to Survive

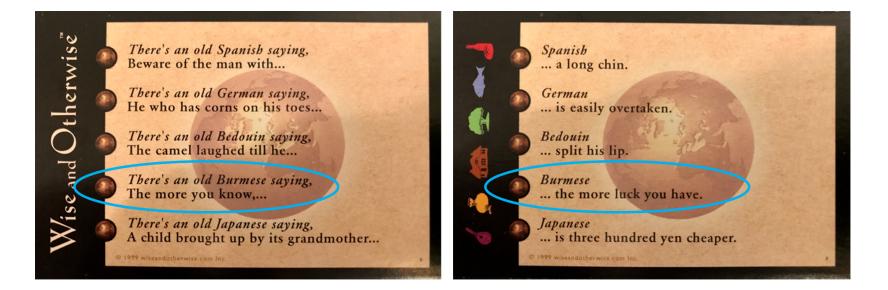

High Stakes Situations

He wanted me to finish the procedure!

ITHS

How do you create luck?

The more you know, the more luck you have.
