

De-identified Clinical Data Repository - Discharge Diagnosis

Please follow the steps described below to query only the discharge diagnosis (coded discharge abstract)

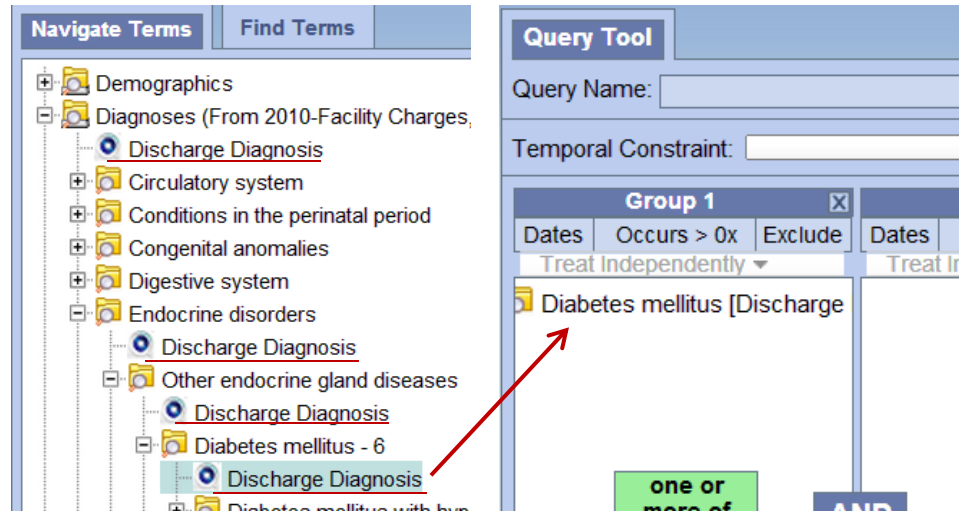

Searching for discharge diagnosis can be done 2 ways.

1. By Navigating Terms

- Under each level of folder in Diagnoses, you will see “Discharge Diagnosis” option (with a different icon).
- Browse to appropriate folder and drag the “Discharge Diagnosis” into the query Tool.

Example shown to the right:

Querying patient count for discharge diagnosis for diabetes mellitus

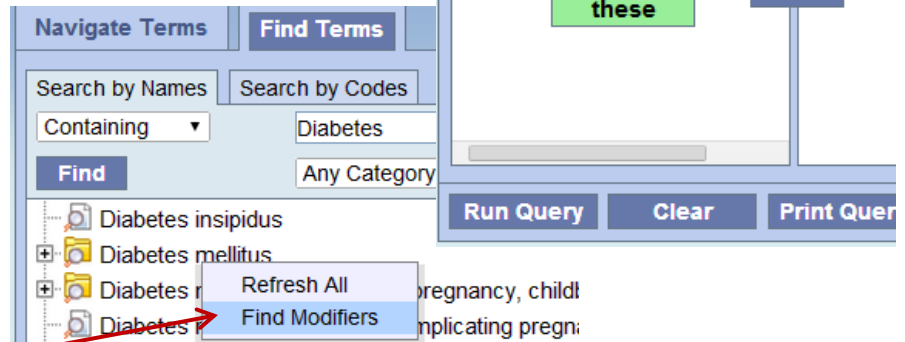

2. By Finding Terms

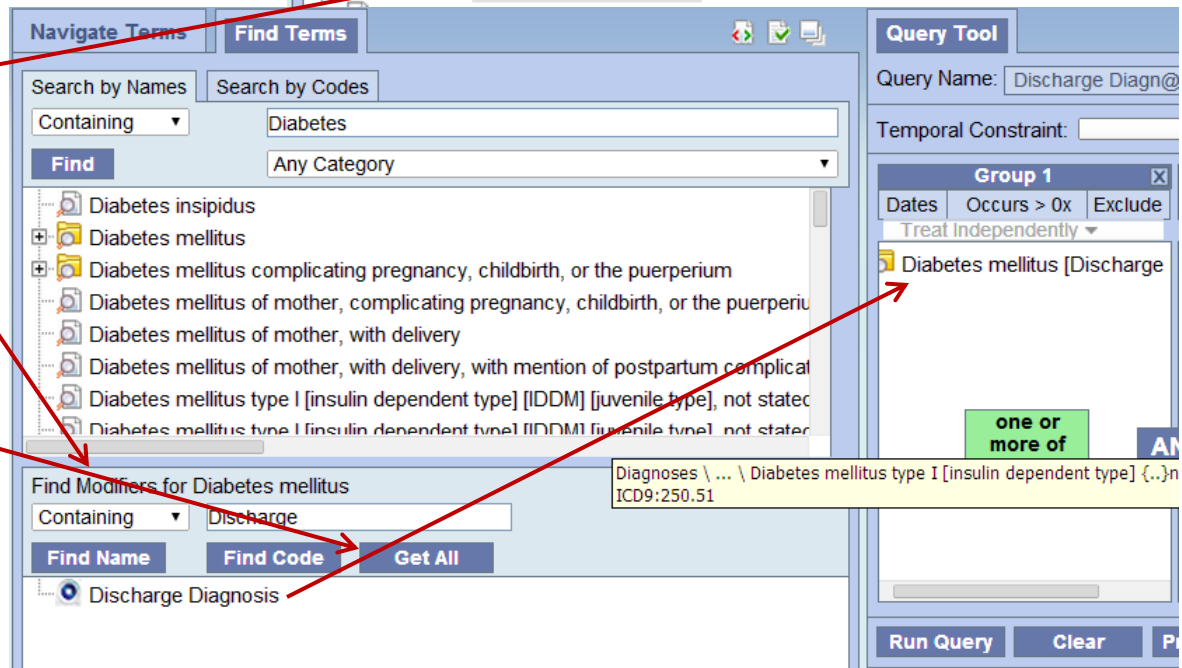

- Search for words or codes in the Find Terms menu

Example shown to the right:

Querying patient count for discharge diagnosis for diabetes mellitus (ICD9 250*)

- Right** click on the selection you'd like to search for and select “Find Modifiers”
- Find Modifiers menu will pop up below
- Click “Get All” and you will get list of options available to search.

“Discharge Diagnosis” option to the query tool to only search only for discharge diagnosis.
