

The Andy I. Choi Mentoring Program of the UCSF-Gladstone Center for AIDS Research

Welcome!

The Andy I. Choi Mentoring Program of the UCSF-Gladstone Center for AIDS Research ([Tribute to Andy Choi](#)) is now in its 16th year of operation. The program is designed to help develop the scientific career goals of early HIV investigators and postdoctoral scholars. It emphasizes one-on-one interactions between well established UCSF faculty investigators and junior researchers pursuing HIV research at UCSF or [affiliated institutes](#).

Submissions for new nominees to the program are accepted in the Fall. To nominate a new mentee to the program, please contact one of the Mentoring Program directors. [Online nominations for new program mentees](#) may be submitted only by CFAR Scientific Council (CSC) members.

The Mentoring Program conducts a [Workshop Series](#) and a Mentee Scientific Symposium. This event is a unique opportunity to present current research to peers, mentors, and the HIV/AIDS research community at large. The symposium is usually a half day event held at the Gladstone Institutes Mahley Auditorium. The program concludes with an all-day Leadership Retreat focused on high priority professional topics.
